

Introduction to Python

[illegible]

Variables

[illegible]

Data Types

[illegible]

int, float, str, bool, list, tuple, set, and dict. Common data types include int, float, str, bool, list, tuple, set, and dict. Common data types include int, float, str, bool, list, tuple, set, and dict. Common data types include int, float, str, bool, list, tuple, set, and dict.

Conditional Statements

[illegible]

Loops

[illegible]

Functions

[illegible]

Object-Oriented Programming

[illegible]

Exception Handling

[illegible]

File Handling

[illegible]

Python in AI

[illegible]

is the most popular language for AI because of libraries such as NumPy, Pandas, PyTorch,
TensorFlow, and scikit-learn. Python is the most popular language for AI because of libraries such
as NumPy, Pandas, PyTorch, TensorFlow, and scikit-learn. Python is the most popular language
for AI because of libraries such as NumPy, Pandas, PyTorch, TensorFlow, and scikit-learn. Python
